Any Type Of Cancer Can Be Cured In Just 2-6 Weeks

Tuesday, December 22, 2015 15:42

Dr. Leonard Coldwell claims that any type of cancer can be cured in just 2 to 6 weeks. Make sure you take a look at the video below this article. You will be surprised when you see it. Yes, that’s true, cancer can be cured. I hope you’ll be amazed as I was when I watched the video for the first time.

Cancer is one of the most dangerous and deadly diseases today. A lot of families have lost a family member cause of this deadly disease. My dad died of cancer when I was 17. That was extremely painful experience for me and it had changed my life completely. The worst thing in your life is to look how the cancer eats your closest family members and friends from the inside and you can’t do anything about it. When I saw Dr. Coldwell’s video and article I was so happy and amazed, because I don’t want to see people die from this terrible disease and their closest friends and family suffer if they lose one. Cancer can attack anyone. You can never know who will be its next victim. So make sure you watch this video below and start believing that there is hope for all cancer and future cancer patients.

The Cancer Industry is too Prosperous to Allow a Cure for Cancer

You’ve probably heard the term “cancer can be treated with the convention chemotherapy treatments and prescribed medications”. But do you actually believe that these medications can cure cancer? I don’t! We’ve spent everything we had to pay for my father’s chemotherapy treatments and medications. All these treatments cost a fortune, and didn’t help my dad with his disease. They even made it worse. In the last few weeks, my dad suffered from agonizing pains, caused by the chemotherapy treatment. Do you know why the cancer industry still offers the chemotherapy and cancer medications to the cancer patients? It’s all because of money. Nobody from the medical industry actually cares about the patients. They just care about profit and making money on selling medications that don’t work and treat cancer patients with the conventional chemotherapy methods that are killing more good cells, than the cancer ones.

Have you ever heard about Dr. Leonard Coldwell?

Dr. Coldwell’s family had some serious cancer problems. All seven brothers and sisters, from his mother’s side suffered from carcinoma. His dad and his grandma also died from cancer. He saw how his closest family members and friends die from this terrible disease and he couldn’t do anything about it. That’s why he dedicated his life in finding an effective cure for cancer.

In his career so far, Dr. Coldwell has seen more than 35,000 patients, around 2.2 million partakers in his workshops who write their life stories and has more than 7 million fans who read his articles and reports. According to some influential people in the medical industry, Dr. Coldwell has one of the leading roles in curing cancer. His website was blocked by the federal government, because of his success in curing cancer.
Dr. Leonard Coldwell claims that cancer can be cured in most patients, without using the conventional chemotherapy treatments or any contact with radiation. But he is not allowed to tell this to anyone. Dr. Coldwell says that’s because of the people who make profit from cancer patients and the law doesn’t allow him to do so.

The healthcare and the pharmaceutical industry earn millions and millions of dollars through the cancer industry. This situation makes legislators legislate laws that will kill us. Or they will make you sick, and the laws that are supposed to protect us will not allow the right treatment for this deadly disease. They will make you sick and make the disease even worse with the poisonous and harsh “medical” treatments.

Dr. Coldwell – The Only Answer to Cancer

Dr. Leonard Coldwell claims that any type of cancer can be cured in 2 to 16 weeks. And there are some types of cancer, if treated with the right treatment can be healed in few minutes. He says that positivity and hopefulness that really helps in the healing process.

First of all, Dr. Coldwell says that we need to eat more vegetables. This type of diet gives the body lots of oxygen. And if we add calcium and other alkalizing foods we will alkalize our bodies. This is very important for all cancer patients because the progress of cancer stop when the body is alkalized.

Other important thing you should know is that our body has to achieve what is called a therapeutic Ph level. pH has 14 levels from 0 to 14. The lower values are the acidic region and the higher values are the alkaline region. The median neutral level is Ph 7. When the body reaches pH 7 it’s alkaline. A level of 7.36 is very good, but when it comes to treatment, a pH of around 7.5 or higher should be present.
