

Dear Sir,

As there is not a senator from NM on your committee, I am reaching out to you as a representative of all the people of the United States.

I implore you, sir, to NOT allow the hearings on Kavanaugh to continue until all of his paper work is available for all to see. Additionally, in light of the information revealed yesterday, his nomination should not be considered all. This president is implicated in the possible covering up of information that may have influenced the outcome of the election and should not be allowed to choose a Supreme Court Justice! As an un-indicted co-conspirator, all nominations by this president should be held for review until after the truth has come to light. This is especially important when considering the nomination of a Supreme Court Justice who may end of being part of the decision about whether or not that president can be charged with and indicted for a crime.

Thank you!

As a democrat, I am sure you are already doing everything in your power to keep this nomination from happening. I would like to take this opportunity to thank you for that! Please continue to stand strong!

Thank you!
